

ENTRY/EXIT SMART STATION

SAFE. SECURE. SMARTER.

A Bluetooth-enabled, cloud-based kiosk with flexible software configurations, seamless integrations, and easy DIY maintenance that guarantees maximum uptime.

OVERVIEW

Smart Design

Entry/Exit Smart Station brings together all the essential elements needed to manage parking access and revenue control into a single elegant unit. Our physical kiosk is identical for entry, exit, or pay-on-foot.

Customizable

The Entry/Exit Smart Station also is highly customizable to meet the demands of each parking facility. Whether it will be used to manage transients or monthlies, the software package is simply configured for each machine to meet the needs of the venue.

Future-proof Platform

The cloud-based software platform powering the logic in all Smart Stations was purpose-built to run in the cloud, offering enhanced scalability, redundancy, and most importantly, since no onsite servers are needed, minimal maintenance and system upkeep. This also allows for easy system reconfiguration as technology and venue needs evolve.

Cash Acceptance Friendly

In addition to traditional credit card payment options, we offer in-lane cash acceptance options. Our cash machines offer an exact change only, or a bill note recycler (BNR) machine that boasts a four-denomination bill recycler, thus eliminating the need to empty and re-fill the machine quite as often.

SMART STATION COMPONENTS

1. Interactive touch-screen display
2. Credit card reader (for payments and access)
3. Ticket/receipt dispenser (pull-tear mechanism)
4. Barcode scanner (mobile and barcodes)
5. Prox/RFID card reader
6. Integrated intercom (video, mic, and speaker)

USB-based Components

All peripherals on the Smart Station are part of a plug-and-play (USB-based) system and can be swapped out in the existing machine as new technology requires.

Easy Maintenance

Our unique FlashCare Maintenance Kit contains all the major components, so operators can quickly replace parts in a matter of minutes, minimizing downtime.

BENEFITS

To view a list of featured properties using FlashParking visit:
www.flashparking.com/featured-properties

Total Reliability

The FlashParking platform runs on the Microsoft Azure Cloud Platform, which today powers 90% of Fortune 500 companies. It provides access to monitor and manage all your properties from a single back-end portal via mobile, tablet or desktop.

Real-time Decision Making

Manage operations in real-time via phone or browser, including rate changes, credit card payments, eParking reservations, electronic validations, and more.

Worry-free Compliance

With FlashParking, you - the parking provider - outsource 98% of the PCI duties to us, the only Level 1 Service Provider. The result is instant and on-going complete PCI compliance. It's that simple!

Extreme Weather Rated

The Smart Stations are UL Certified to withstand all extreme weather conditions, and aluminum built to withstand corrosion.

Extending Your Brand

The standard shell of the Smart Station comes in a powder-coated silver aluminum; properties looking to extend their brand to the parking facility can wrap their Smart Stations in any design.

“What we’ve seen with Flash has been really remarkable. It’s been one of the only solutions we’ve ever installed, and not had one service or support call 6 months down the road.”
