Mini-Smart Station

ONE MACHINE, MANY USES. Streamlined kiosk with flexible, adaptable configurations that perform reliably and accurately.

Overview

SAFE. SECURE. SMARTER. The parking world is complex; each property presents unique needs and not every property requires the same parking equipment configuration. With that understanding, we developed the Mini-Smart Station to harness the power of our cloud-based parking platform and to be flexible for different parking scenarios. You will no longer need to buy totally new equipment as needs change, a simple re-configuration of the unit is all that is required.

Value and Benefits

The PARCS Mini-Smart Station is a streamlined version of our full-sized Smart Station with adaptability for key specific parking applications.

- ✓ **Total Reliability**
We provide comprehensive access to monitor and manage all your properties from a single back-end portal via mobile, tablet or desktop. With a 99.99% uptime and a 61% reduction in support calls, you don't need to worry about frustrating support and maintenance concerns.
- ✓ **Real-time Decision Making**
Cloud native technology allows for flexible and quick management decisions. Manage operations like rate changes, credit card payments, eParking reservations, and electronic validations in real-time via phone or browser.
- ✓ **Easy Monthly Parking**
Our system can be configured for over 65 different types of RFID cards that monthly parkers use. Plus, our patent-pending Bluetooth beacon technology is embedded in all our products. This means rolling down the window to tap their prox card will become a thing of the past!
- ✓ **Worry-free Compliance**
Outsource 98% of the PCI duties to us, the only Level 1 Service Provider in the industry. The result is instant and on-going complete PCI compliance. It's that simple!
- ✓ **Easy Maintenance**
All peripherals on the PARCS Mini-Smart Station are part of a plug-and-play (USB-based) system and can be swapped out in the existing machine as new technology emerges. Our unique FlashCare Maintenance Kit contains replacements for all the major components, so operators can quickly replace parts in a matter of minutes with minimal downtime.
- ✓ **Assembled in the US**
Our PARCS Mini-Smart Stations is manufactured in Austin, TX, minimizing shipping time and increasing speed of deployment.
- ✓ **Extend Your Brand**
The standard shell of the PARCS Mini-Smart Station comes in a powder-coated silver; properties looking to extend their brand to the parking facility can wrap their PARCS Mini-Smart Stations in a design of their choosing.

Smart Station Components and Configurations

All Smart Stations come standard with robust reporting and on-demand dashboards that can be accessed anywhere on any device. The mobile app module allows you to manage parking operations from the palm of your hand. Plus, you get real-time software updates as demands evolve and new software patches are required.

There is also an optional cash acceptance machine with two choices: exact change only or bill note recycler. Reconciled funds are accounted for electronically and stored in a single locked cashbox. The BNR facilitates a closed-loop cash system, allowing facilities to simplify the cash management process and increase profitability.

Beyond the configurations below, there are many payment platform, call-center, analytics and other integrations that can be performed.

Dimensions: 7.5" w x 7.5" d x 55" h

Weight: approx. 38 lbs

Voltage: 120V

Operating Temperature: -20 to +140 F

Humidity: 15-95% rH noncondensing

Agency certifications: UL 60950-1/CSA C22.2 N. 60950-1, and UL 60950-22 Outdoor Use

Rating: UL 60950-22 under NEMA 250-2008
