

FLASH

Smart Station

SAFE. SECURE. SMARTER. Bluetooth-enabled, cloud-based kiosk with flexible software configurations, seamless integrations, and easy DIY maintenance guarantees maximum uptime.

Overview

Simple and Flexible Design

Our Smart Station assembles all the essential elements needed to manage parking access and revenue control in a single elegant unit. Our physical kiosk is identical for entry, exit, pay-on-foot, and multi-space meter. Plus, it is highly customizable to meet the unique demands of each parking facility. Whether it will be used to manage transients, monthlies or valet, the software package is simply configured for each machine's role in the venue. In addition, our machines can be configured to accept credit card, RFID, or cash payments with exact change or bill note recycler (BNR).

Future-proof Platform

FlashOS, our mobility hub operating system, powers the logic in all our Smart Stations was purpose-built to run in the cloud, offering enhanced scalability, redundancy, and most importantly—since no on-site servers are needed—minimal maintenance and system upkeep. Cloud-based software also allows for easy system reconfiguration as technology and venue needs evolve.

Value and Benefits

✓ Versatile Engineering

Our unique Smart Station can meet all your needs as we can simply configure the machine as either an entry, exit or as a pay-on-foot, pay-and-display, pay-by-plate, or pay-by-space kiosk. When replacement parts are needed, they are identical in all Smart Stations which minimizes spare parts costs and immediate access.

✓ Total Reliability

We provide comprehensive access to monitor and manage all your properties from a single back-end portal via mobile, tablet or desktop. With a 99.99% uptime and a 61% reduction in support calls, you don't need to worry about frustrating support and maintenance concerns.

✓ Real-time Decision Making

Manage operations like rate changes, credit card payments, eParking reservations, and electronic validations in real-time via phone or browser.

✓ Worry-free Compliance

With Flash, you—the parking provider— outsource 98% of the PCI duties to us, the only Level 1 Service Provider in the industry. The result is instant and on-going complete PCI compliance. It's that simple!

✓ Extreme Weather Rated

The Smart Stations are UL Certified to withstand all extreme weather conditions and aluminum built to withstand corrosion.

✓ Extending Your Brand

The standard shell of the Smart Station comes in a powder-coated silver; properties looking to extend their brand to the parking facility can wrap their Smart Stations in a design of their choosing.

Smart Station Components and Configurations

All Smart Stations come standard with robust reporting and on-demand dashboards that can be accessed anywhere on any device. The mobile app module allows you to manage parking operations from the palm of your hand. Plus, you get real-time software updates as demands evolve and new software patches are required.

There is also an optional cash acceptance machine with two choices: exact change only or bill note recycler. Reconciled funds are accounted for electronically and stored in a single locked cashbox. The BNR facilitates a closed-loop cash system, allowing facilities to simplify the cash management process and increase profitability.

Beyond the configurations below, there are many payment platform, call-center, analytics and other integrations that can be performed.

Dimensions: 16" w x 12.41" d x 55" h

Weight: approx. 58 lbs

Voltage: 120V

Operating Temperature: -20 to +140 F

Humidity: 15-95% rH noncondensing

Agency certifications: UL 60950-1/CSA C22.2 N. 60950-1, and UL 60950-22 Outdoor Use

Rating: UL 60950-22 under NEMA 250-2008
