

Modern Technology Yields Modern Profits.

Parkonect is the next generation in IoT parking technology. It's augmentable, affordable, upgradeable, frictionless and cloud-connected, providing real-time asset data and giving you the tools needed to maximize your asset's revenue potential.

Our platform encompasses more than hardware and software. It equips our customers with the flexibility and insights required to make real-time decisions and changes based on what their facility needs: **To streamline operations and transform potential into profit.**

Future Ready Cloud Solution

Stay future-ready with a parking platform that evolves alongside industry advancements through constant updates. You won't be stuck in the past with Parkonect.

Frictionless Parking Experiences

Meet the demands of today's customer by delivering multiple contactless options and modules, such as Text2Enter, ParkingCashier.com, LPR, AVI, Bluetooth and more.

Cloud Control and Real-Time Analytics

Control all aspects of your asset through any internet-connected device, including smartphones, and view actionable data to make decisions in real time.

Scalable for Every Asset

Scale your solution to your portfolio's needs, from add-on components to full parking systems.

Advanced APIs & Integrations

Connect your asset to the world around you through our advanced APIs to enhance revenue potential. Add multiple channel partners, integrate with existing BI tools, leverage monthly billing systems and more.
