

FULLY INTEGRATED

Parking Solution

Enforcement

Our software uses real-time data transfer between handhelds and OmniPark servers.

- Innovative and agile software solutions that **transform data** into actionable information
- Parking management and analytics available 24/7 through the **cloud-based** web portal
- **Instantly upload** notice information with multiple images
- OmniPark's Enforcement software also offers **License Plate Recognition (LPR)** to increase productivity and efficiency. The LPR solutions can be implemented via:
 - (HH) Handheld devices
 - (FC) Fixed camera installations
 - (VM) Vehicle mounted systems

Simple, **easy-to-use** touchscreen interface

Increase your ROI with the cloud-based, fully integrated parking software solution by OmniPark

OmniPark Enforcement Improves:

Revenue Management

Robust reporting for accountability and auditing purposes

Operating Efficiencies

Easy-to-use technology will maximize employee efficiency and minimize task time

Data-Driven Decisions

Transforming data into actionable information gives businesses the opportunity to make better decisions

Parking & Traffic Management

Real-time data transfer instantly uploads notices, rate changes and online payments

Security

GPS/GIS eliminates loss and allows for real-time device tracking

Convenience

OmniPark software allows enforcement personnel to easily manage their parking locations

License Plate Recognition

- **Decreases manual input** by attendants
- Improves user experience
- **Improves the speed** of enforcement in any parking environment
- Fully integrated with the **OmniPark Cloud**
- Payment information can be **integrated with existing third-party systems (paystations)**
- Creates **greater efficiency** for your enforcement teams
