Enforcement Solutions

Our suite of enforcement solutions provides you with the tools needed to ensure full control of your parking location. Cloud-born technology enables you to improve compliance, make data-driven decisions, and increase revenue, while monitoring your entire operation in real time.

Able to perform equally well in a single location or across a portfolio, our solutions adapt to support both manual and automatic enforcement models.

FLASH Enforcement Solutions Benefits

-  Decrease your labor costs while increasing revenue with automated enforcement
-  Increase your ROI with a fully-integrated FLASH parking solution
-  Provide hands on verification with our manual enforcement solutions
-  Transform data into actionable business decisions
-  Issue physical notices immediately or send out emails, text messages, and/or letter based notices
-  Analytics and reporting available 24/7
-  Fully integrated with multiple permit and payment options
-  Increase labor efficiency with digital dashboards and business-critical analytics

Configured for your needs

Custom configured to the needs of your site or across a portfolio of parking assets, our solutions can adapt to support any enforcement model and will always include cloud-based data collection and offline mode. All citations are logged in the cloud-based management system and reconciled with license plate databases so that violators can be promptly issued notices via mail. Choose from manual and automated enforcement options.

Manual Enforcement

Handheld

An on-site staff member with a handheld device walks around the lot and either scans license plates or manually denotes the presence of tickets, hang tags, or stickers. The benefits of a handheld enforcement solution include:

- ✓ Most cost effective option
- ✓ Ideal for smaller locations
- ✓ Suitable for unique garage layouts

Manual Enforcement

Mobile License Plate Recognition (LPR)

A vehicle equipped with Genetec LPR cameras drives around the lot and scans license plates. Benefits of mobile LPR include:

- ✓ Time zoning capabilities
- ✓ Reduced labor costs
- ✓ Ability to cover greater area/multiple lots
- ✓ Ideal for doing regular inventorying or running time zones

Automated Enforcement

Fixed License Plate Recognition (LPR)

LPR cameras are stationed at each entry and exit point to capture license plate information and calculate the duration of the parking period. If upon exit, a vehicle has not made payment, a violation is automatically recorded in the system. Benefits of automatic, fixed LPR include:

- ✓ Great for nesting areas
- ✓ Ideal for high turnover location
- ✓ Reduced labor and management costs
- ✓ Minimal effort for end user

Parking control in the palm of your hand
